CODING CONTEST

Time duration: 1:30 hrs

No. of rounds: 2

Round 1 - DEBUGGING:

- All participants must register before the competition starts.
- Late registrations will not be entertained.
- Only **individual participants** are allowed.
- Participants will be provided with buggy code, the task is to identify and fix errors (syntax, logical, or runtime) within the allotted time.
- Scoring will be based on the number of errors fixed, code optimization, and program output correctness.
- The results will be announced immediately.

Round 2 - CODING ROUND:

- Selected participants from Round 1 will proceed to this round.
- Participants will be given problem statements to solve by writing code from scratch.
- Evaluation criteria include correctness, efficiency, and clarity of the code.
- Each round will have a fixed duration. Participants must submit their solutions before the timer ends.
- The competition will support commonly used programming languages (e.g., Python, Java, C, C++).
- Participants must specify their preferred language before the round begins which will be conducted through any online coding platforms.
- Violation of any rules may lead to immediate disqualification.
- Misconduct, inappropriate behaviour, or technical manipulation will result in removal from the competition.

Necessary resources like computers or development environments will be provided.
